

# Application of the UM-SA12 in southern Africa

# Operational Aspects of the UM SA12 LAM

The SAWS run a regional version of the UM in-house  
Operational on a SX-8 high performance computer

The domain covers the whole of southern Africa as well as  
surrounding oceans

The UM SA12 has been operational since October 2006.

# Operational Aspects of the UM SA12 LAM

## Configuration of UM

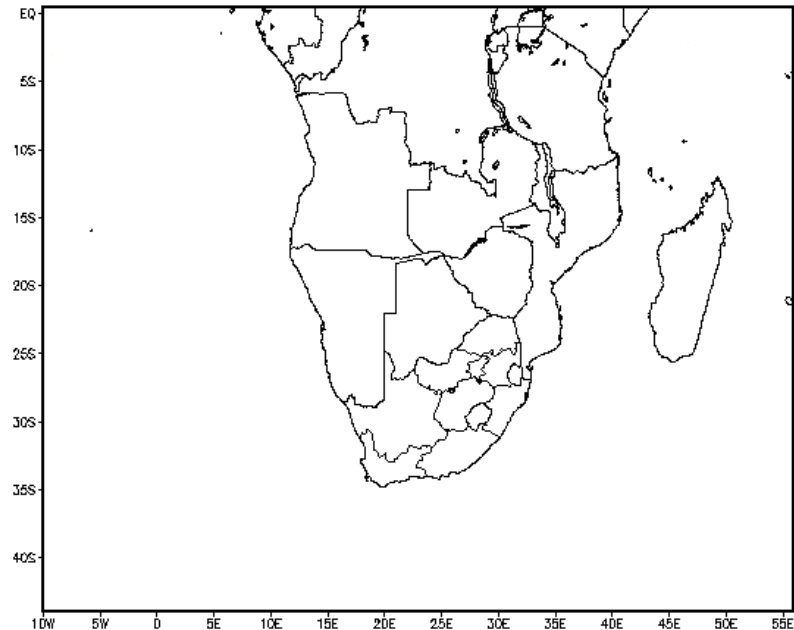

12km horizontal resolution

38 vertical levels

Domain:

20W-50E; 45S-0S (SADC)

Provides hourly numerical  
forecasts for up to two days  
ahead (48 hours).

# Operational Aspects of the UM SA12 LAM

- NEC sx8 single node (8 CPUs)
- 648 x 480 grid points
- 38 levels
- 128GB memory, 1.2TB disk-space
- Speed: 42 minutes per 24 hr forecast for SA12:  
648x480L38
- 5 Operational runs daily

# Configurations of the UM SA LAM

### [12km no-DA \(Xaana\) run](#)

- ↪ Updated: Once daily
- ↪ Available ~ **13:00 SAST**
- ↪ 12km Resolution
- ↪ No Data Assimilation
- ↪ Last update: **11 Nov 11:39**
- ↪ Forecast: **11 Nov 00:00z to 13 Nov 00:00z**
- ↪ Temperature Forecast Error : **11 Nov**
- ↪ Day 1: [Tn Tx](#)
- ↪ Day 2: [Tn Tx](#)

### [12km version 7.3 \(Xaanti\)](#)

- ↪ Upgrade from vn6.1 to vn7.3
- ↪ Available ~ **05:00 SAST**
- ↪ 12km Resolution
- ↪ No Data Assimilation
- ↪ Last update: **12 Nov 04:07**
- ↪ Forecast: **12 Nov 00:00z to 14 Nov 00:00z**
- ↪ [New features](#)

### [12km DA \(Xaang\) run](#)

- ↪ Updated: Once daily
- ↪ Available ~ **09:00 SAST**
- ↪ 12km Resolution
- ↪ Continuous Data Assimilation
- ↪ Last update: **12 Nov 08:50**
- ↪ Forecast: **12 Nov 00:00z to 14 Nov 00:00z**
- ↪ Temperature Forecast Error : **11 Nov**
- ↪ Day 1: [Tn Tx](#)
- ↪ Day 2: [Tn Tx](#)

### [Xaanj run](#)

- ↪ Updated: Once daily
- ↪ Available ~ 20:00 SAST
- ↪ 12km Resolution
- ↪ Intermittend Data Assimilation
- ↪ Last update: **27 Nov 20:17**
- ↪ Forecast: **27 Nov 12:00z to 29 Nov 12:00z**

### [15km \(Xaaha\) run](#)

- ↪ Updated: Once daily
- ↪ Available ~ 01:30 SAST
- ↪ 15km Resolution (only over SA)
- ↪ No Data Assimilation
- ↪ Last update: **12 Nov 00:48**
- ↪ Forecast: **12 Nov 00:00z to 14 Nov 00:00z**
- ↪ Temperature Forecast Error : **11 Nov**
- ↪ Day 1: [Tn Tx](#)

### [15km version 7.3 \(Xaakon\)](#)

- ↪ Updated: Once daily
- ↪ Available ~ **09:00 SAST**
- ↪ 15km Resolution (only over SA)
- ↪ No Data Assimilation
- ↪ Last update: **12 Nov 08:35**
- ↪ Forecast: **12 Nov 00:00z to 14 Nov 00:00z**

**\* 4KM MODEL : NOT VERIFIED \***

### [Saanb run](#)

- ↪ Updated: Once daily
- ↪ Available ~ 01:30 SAST
- ↪ 4km Resolution (only over SA)
- ↪ Intermittend Data Assimilation
- ↪ Last update: **17 Jan 09:27**
- ↪ Forecast: **16 Jan 18:00z to 18 Jan 00:00z**

# Configurations of the UM SA LAM

- UM SA12: main model run
- Initialised daily at 00UTC
- Initial conditions & lateral boundary conditions from Global UM
- 18 UTC 6hr forecast
- 48 hr forecast
- Updates daily ~ 5:00 SAST (03 UTC)

# Configurations of the UM SA LAM

- UM SA12 DA: continuous data assimilation
- Same domain and resolution as UM SA12
- 48 hr forecast initialised daily at 00UTC
- Ops and background error files from Global UM
- Updates daily ~ 9:00 SAST (07 UTC)

# Configurations of the UM SA LAM

- UM SA15: 3 model runs
- Horizontal resolution of 15 km
- Only covers the South African domain
- 48 hr forecast initialised daily at 00UTC
  1. Old version of UM code (v 6.9)
  2. Old version but with different cumulus scheme
  3. Upgrade version of UM code (v 7.3)
- Updates daily ~ 1:00, 1:30 & 8:30 SAST respectively

# Applications of the UM SA LAM

- Regional responsibilities (RSMC / SWFDP)
- Training ([www.eumetrain.org](http://www.eumetrain.org))
- Flash Flood Guidance
- Client specific forecasts (i.e. ESKOM)
- Site specific forecasts (i.e. wind farms)
- Regional multi-model ensemble probability forecasts

# UM Upgrade 2015

## Changes at PS34

### Global

**17km** 70 Levels (ENDGame)

- 48 hour forecast twice/day
- 6 day forecast twice/day

NAE retired in July 2014  
(our previous regional model)

### Euro4

- 4.4km 70 Levels
- 60 hour forecast twice/day
- 5 day forecast twice/day

### UKV

- 1.5km 70 Levels
- 36 hour forecast eight times/day

# Ensemble NWP model suite

## Changes

### MOGREPS-15

will be retired  
by March 2015

### MOGREPS-G

- 33km 70 Levels
- **7 day** forecast 4 times/day
- 12 members
- 24 member lagged products

We no longer run MOGREPS-R  
(our regional ensemble model)

### MOGREPS-UK

- 2.2km 70 Levels
- 36 hour forecast 4 times/day
- 12 members

# Testing the ENDGame core

Lee waves over the UK. 12 June 2013

# Case Studies (Winter Storm)

## ENDGame

UKV EGD Precipitation rate [mm/hr] and PMSL  
Tuesday 0900Z 03/01/2012 (t+24h)

# Maintaining our global standing

Global NWP Index (v analysis) basket  
% difference relative to Met Office

CBS ranking relative to Met Office, 00Z-12Z  
Combined Areas

© Crown Copyright 2014. Source: Met Office

# Benefit of UKV over Global

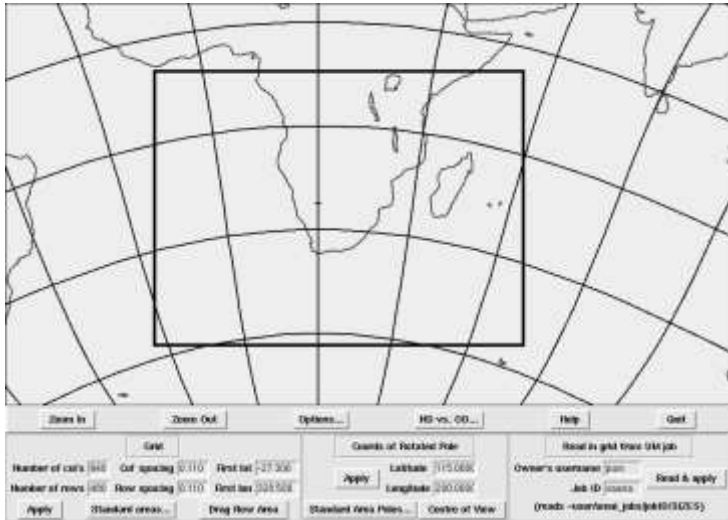

Relative benefit (%)

UK Index – focus on surface weather

UK4 to April 2010, then UKV

UKV at least 10% better

Main domain at 12 km (to decrease to 4 km mid 2014)

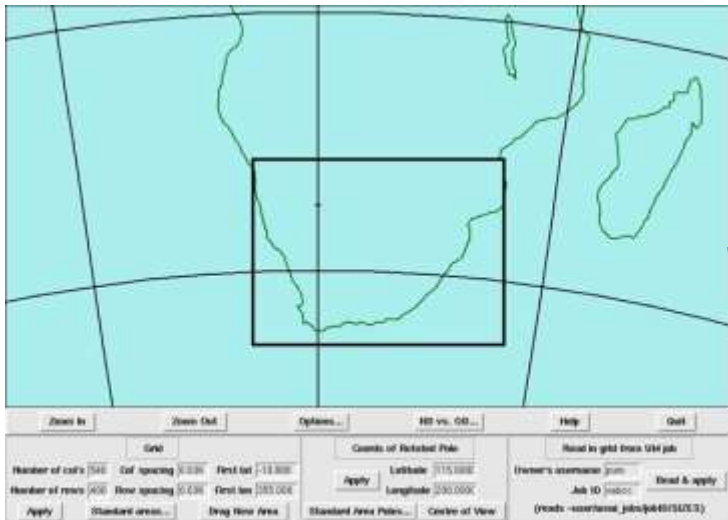

38 – vertical levels

Model output on 19 pressure levels:

1000 950 900 850 800 750 700 650 600 550 500 450 400 350  
300 250 200 150 100 hPa

Hourly output (1 – 48)

Initialised 00Z

Based on main model forecast, but output domain decreased

23 – vertical levels

Output on 23 vertical model levels (sigma coordinate/terrain following)

Hourly output (1 – 48)

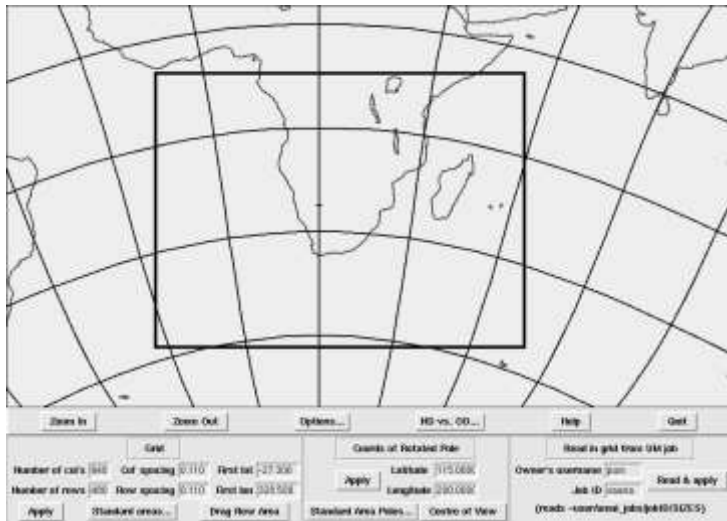

Initialised 00Z

Limited variables

## HPC upgrade – mid-2014

Main domain at 4 km  
70 – vertical levels (80 km up in the atmosphere)  
Number of variables output will increase

South African domain to decrease to 1.5 km  
70 – vertical levels  
Number of variables output will increase

# Effect of resolution increase

12 km

4 km

1.5 km
