DISSEMINATION WEATHER INFORMATION METHOD

- Dissemination of weather information is not a organizational in NMS.
- The National Adaptation Programme for Climate Change (NAPA) led by the Ministry of Environment, which has implemented a project on the fight against climate change for agriculture and food security.
- This project has put in place a system for disseminating weather information below

DISASTER MANAGEMENT

- The NMS is a member of the management structure of disaster risk . This structure is led by the Ministry of the Interior. The challenge is that the lack of structural organization of the structure, national policy of risk management is not well defined and the coordination of activities.
- Often when there are events of disasters, each member of the structure involved in this form of organization

RELATIONSHIP MEDIA AND NMS

- Opportunity of informations
- Communications languages
- Financial ressources

FEEDBACK DISASTER MANAGEMENT

- Redefining national policy on disaster risk management
- Establish an organizational structure of a platform for disaster risk management , with clearly defined for each members of the platform roles.
- Set budget policy for proper functioning of the platform

FEEDBACK PUBLIC

- The survey has never been done at NMS level , other times the feedback received from the public spontaneously and others in the media, often educated public opinion gives positive satisfaction and uneducated give negative opinion on service satisfaction .

THANKS
